Newman and colleagues b cautioned, however, that the research also indicates a greater Righter Monthly Review-May 2011 with compliance for clients who use these technologies with little or no contact. At the follow-up assessment, the researchers found significant reductions in disorder severity across all five disorders and significant decreases in the number of participants meeting diagnostic criteria for all of the disorders except panic disorder for which there was a decrease in the number, but not a significant one. The active voice and present verb tense should be used.
