Literally, Earthly life as we know it is now threatened and endangered by global warming, climate changes, rising ocean levels, and unlivable environmental pollution. A powerful theory on human rationality and human-centred values is needed to contest the premise of the economic man paradigm. Other Gaps Numerous other gaps exist such as that studies are lacking from our Conference paper. Implementing social responsibility, companies need processes integrating social, environmental, ethical, human rights, and consumer issues into business operations. However, despite the obvious link to the ethics literature, the literatures on ethics and CSR have largely grown in parallel although there are some conceptual studies making the bridge between the two literatures e. Corporate social responsibility is part of the organizational culture as well as a field in and of itself Corporate social responsibility has been a field that has been fairly closed off and separate Aguinis and Glavas, which might be why organizational psychologists have not been more involved. Finally, several counterarguments have been advanced against those who reject CSR altogether.
