Would replacing the GPS with another brand or changing something on the iPad side of the interface help? Horizontal next to my right leg was the most convenient, but I had to rig up a cardboard shade to reduce sky glare on the screen, and it still copped lots of sun. I do not recommend! Size They need to be extremely careful in what they post online, as airline recruiters will review their social media. Power iPads offer good battery life: approximately hours for reading and Internet or hours in an airplane when an external GPS is attached. Now, you have WX, Traffic, attitude backup with an AHRS model and an incredible amount of mapping and data at your fingertips for just pennies verses the cost of a new MFD—not to mention all the certified sensors you would need to have the same capability as your tablet! The latest generation of iPad Pro models from Apple are some of the most powerful sure to get a device with enough memory! Here's a look at how

to use all the new features.
